Just wanted to follow-up with you regarding the air monitoring and olfactory testing last night. I went to seven different locations including Harahan, the Westbank, Lafitte, Downtown NO, and Chalmette. I did not detect any noticeable petroleum odors and no readings above background on the TVA or MultiRae (CO, H2S, LEL and O2) were observed. I collected GPS coordinated at each location and all that information was given to Tom Walzer.

Hope this was what you needed. Let us know if there is anything else we can do.

Thanks,
Jeff Wright
